

SANDING BLOCK FAPI-EVO - TRIPLE-FLEX

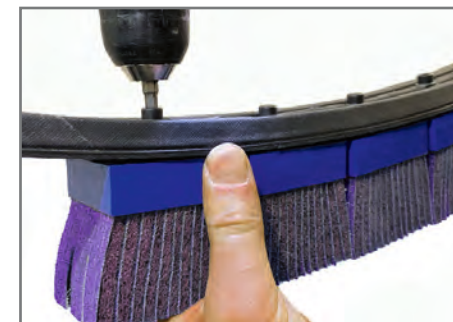

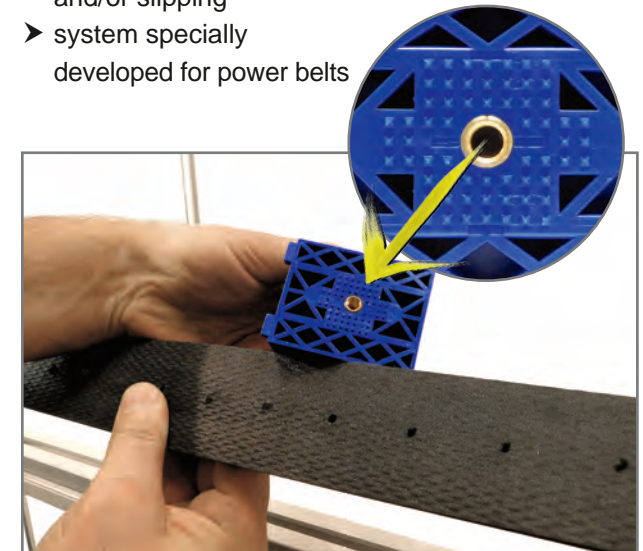

Maximum flexibility
for best edge rounding!

Suitable for

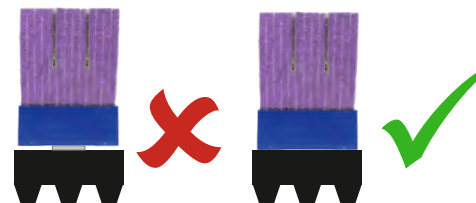

LISSMAC and GECAM

- new type of tool fixing
- sanding blocks protected against twisting and/or slipping
- system specially developed for power belts

Only to be used on belts without guide rails!

Support surface for mounting the blocks must be flat resp. the underside of the block must be in full contact with the surface.

Watch our video on the assembly
of the FAPI-EVO...
