

DEBURRING DISC FAPI-SOLID

- max. deburring performance in the shortest possible time

PICARD

Friedrich August Picard
GmbH & Co. KG

WISSEN WORUM ES SICH DREHT

The deburring discs of the FAPI-SOLID series are the ideal tool for maximum deburring performance - a solid tool for solid results.

The FAPI-SOLID achieves a process improvement due to the often higher use of abrasives. It is deburred and rounded faster and thus in a shorter time.

Any feed that can be driven faster, every minute that is less needed to reach your target, brings enormous savings potential. This is our incentive and can be implemented with our FAPI-SOLID series.

Convince yourself of our new deburring disc series!

WISSEN WORUM ES SICH DREHT

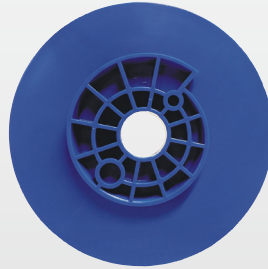

Mounting:

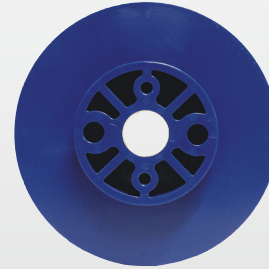

FAPI-M14
Ø 115 mm | CW*

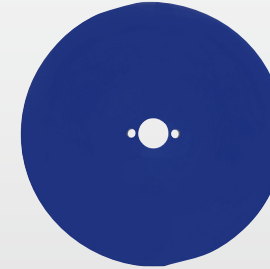

FAPI-TRIM
Ø 115 mm | CW*
Ø 125 mm | CW + CCW*

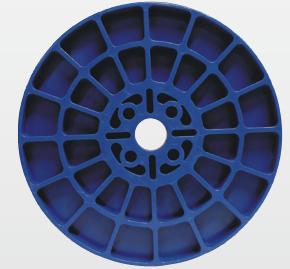

FAPI-FIT
Ø 150 mm | CW + CCW*

FAPI-150
Ø 150 mm | CW + CCW*

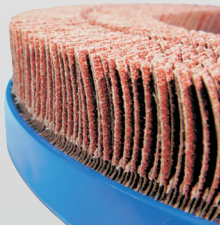

FAPI-180
Ø 180 mm | CW + CCW*

FAPI-250
Ø 250 mm | CW + CCW*

Facing types:

BROWN

the allrounder
suitable for all
materials

BLUE

our zirconium
corundum
variety for steel
and higher
steel alloys

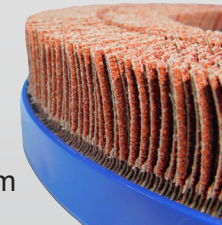

VIOLET

the stainless
steel variety

BLACK

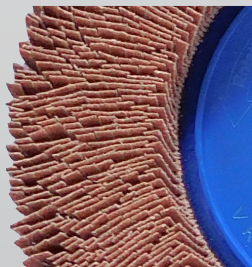

our variety
for the
processing
of aluminium

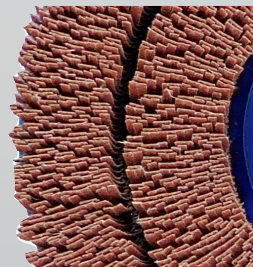

CUBIRINHA EXTREM

for stainless
steel and
higher steel
alloys

Facing varieties:

ER* (Standard)

DR*

* CL = clockwise rotation | CCW = counter clockwise rotation
ER = single row | DR = double row
