WISSEN WORUM ES SICH DREHT

...for a perfect surface!

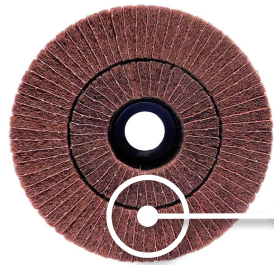

FACING ARRANGEMENTS

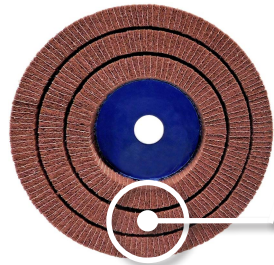

SINGLE ROW [ER]

COMPACT

DOUBLE ROW [DR]

FLEXIBLE

TRIPPLE ROW [TR]

VERY FLEXIBLE

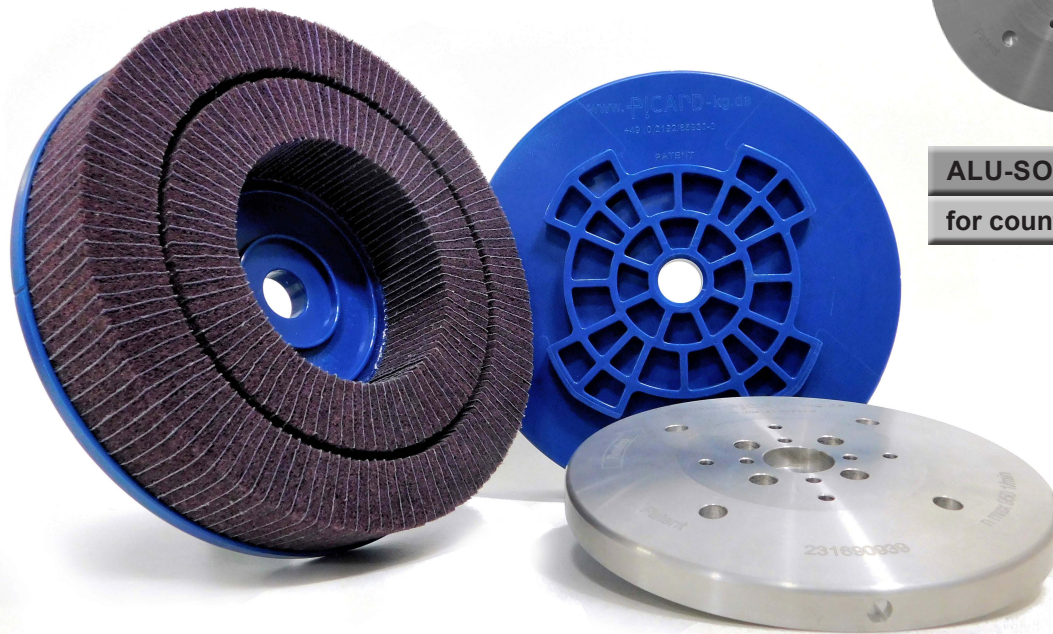

The deburring disc FAPI-FIX250 can be individually adapted to the machining process by selecting the abrasive fleece and abrasive cloth as well as the facing arrangement (single, double or triple row).

DEBURRING DISC FAPI-FIX250

Now new in our deburring disc family!

With the patented quick-change system, the deburring disc can be replaced by simply screwing it in or out. No more time-consuming screwing!

The suitable ALU-socket for common machine manufacturers such as Loewer, Q-fin, etc. is available for clockwise and counter-clockwise rotation.

ALU-SOCKET

ALU-SOCKET FAPI-FIX250

for clockwise rotation

ALU-SOCKET FAPI-FIX250

for counter-clockwise rotation
